About NES

NES' team of Health & Safety professionals has provided safety oversight for client work over the past 20 years. Oversight projects range from heavy civil to utility operations and include government remedial work. NES' safety observations support our clients' safety goals and work to effect a culture of heightened safety awareness. Through careful and attentive observations, our team's approach is to work with the stakeholders to successfully identify potential safety hazards, communicating those observations effectively to the appropriate personnel, documenting the hazards and Best Management Practices (BMPs) observed, and taking the proper remedial actions.

- Folsom Dam Auxiliary Control Structure
- California Wildlife Disaster Recovery

- PG&E Construction Safety Oversight
- PG&E Hunters Point Power Plant Demolition

NES How We Can Help

Environmental Compliance & Consulting

NES provides a range of environmental compliance and consulting services. These services include environmental audits, technical and regulatory advice, litigation support, hazardous waste treatment permitting, training, and environmental staffing.

Occupational Health & Safety

NES helps clients develop and maintain occupational health & safety programs that comply with federal and state regulations and protect worker safety. Services include work site evaluations, program gap analysis, exposure assessments, accident investigation and root cause analysis, and safety training.

Construction Safety Oversight Services

NES' team of experienced construction safety and occupational safety and health professionals has assisted major northern California construction firms and utility companies with safety program integration for their project staff and subcontractors to ensure safety program consistency and accountability. Coupled with industrial hygiene skill sets, this safety oversight offers a strong combination of hazards recognition and assessment for our clients.

Hazardous Materials & Waste Management and Transportation Safety

NES provides hazardous materials & waste management and transportation safety consulting and training to a multitude of private industry and government entities. Our clients retain our services due to the scope of expertise we provide, which covers all aspects of hazardous materials & waste management, from handling and storage regulations compliance to the safe and compliant transportation of hazardous materials, materials of trade, and hazardous waste. NES performs vehicle inspections in adherence to the applicable North American Standard Driver/Vehicle Inspection Level required or requested on a project.

Industrial Hygiene

NES has conducted a wide range of industrial hygiene evaluations and assessments throughout California and across the U.S. The NES IH team is composed of staff members holding the following certifications: Certified Industrial Hygienist (CIH), Certified Safety Professional (CSP), Certified Asbestos Consultant (CAC), Certified Lead Inspector/Risk Assessor (CDPH I/A), Professional Engineer (PE), and Associate Safety Professional (ASP).
