

NES How We Can Help

Environmental Compliance & Consulting

NES provides a range of environmental compliance and consulting services. Services include environmental audits, technical and regulatory advice, litigation support, hazardous waste treatment permitting, training, and environmental staffing.

Occupational Health & Safety

NES helps clients develop and maintain occupational health & safety programs that comply with federal and state regulations and protect worker safety. These services include work site evaluations, program gap analysis, exposure assessments, accident investigation and root cause analysis, and safety training.

Clandestine Laboratory Safety Training

NES is recognized internationally as the leader in clandestine laboratory safety training and has developed the first clandestine laboratory safety program in the U.S. on behalf of the U.S. Drug Enforcement Administration. We have trained thousands of law enforcement personnel from around the globe to safely and effectively dismantle different types of clandestine drug labs and to work in other illicit hazardous environments throughout the U.S. and abroad.

Hazardous Materials, Waste Management & Transportation Safety

NES provides hazardous materials & waste management and transportation safety consulting and training to private industry and government clients. Our expertise covers all aspects of hazardous waste management and storage, the handling of hazardous materials, and the safe transportation of hazardous materials, materials of trade, and hazardous waste.

Industrial Hygiene

NES has conducted a wide range of industrial hygiene evaluations and assessments throughout California and across the U.S. The NES IH team includes staff members holding the following certifications: Certified Industrial Hygienist (CIH), Certified Safety Professional (CSP), Certified Asbestos Consultant (CAC), and Certified Lead Inspector (CDPH I/A).
