- Lead Sampling
- Exposure Assessments
- Indoor Air Quality Assessments
- Clan Lab Assessments
- Safety Oversight
- Health & Safety Program Development
- Workplace Process Hazard Assessments

QUALIFICATIONS

- Certified Industrial Hygienists
- Certified Safety Professionals
- Certified Asbestos Consultants
- Lead Certified Assessor/Monitor

About NES

NES has extensive experience with hands-on management of industrial hygiene issues, with the technical know how to come up with solutions that work both effectively and efficiently. Experts in indoor air quality, ergonomic issues, mold, and workplace exposure to hazardous materials, we use protocols developed by national professional organizations to investigate "sick building syndrome" and "building-related illness" complaints. We evaluate heating, ventilation, and air conditioning systems to identify problems and pinpoint their sources.

Major Cases

- California Wildfire Disaster Recovery
- California Capitol Reconstruction

- Bateson Building Restoration Project
- Army National Guard Site Assessment
